January 13, 1999

Dear Class of 2003,

I take great pleasure in informing you of your appointment to the first-year medical class at the Tulane University School of Medicine, to enter in August of 1999. I sincerely hope that you will accept our invitation to take your medical training at Tulane and look forward to having you join us.

In order to reserve your place in the class, we must receive, within the next two weeks, written notification of your intent to accept our invitation. At anytime between now and May 15, 1999, we must receive a check, payable to the Tulane Educational Fund, in the amount of $500; this deposit will be credited against your first tuition billing. Please understand this deposit is non-refundable and should indicate your final decision to attend Tulane University School of Medicine. We ask that should you decide not to attend Tulane, you inform us in writing so that we can maintain an accurate accounting of our class.

I am sure you will understand that your appointment is contingent upon successful completion of the academic program in which you are currently enrolled, and maintenance of the level of academic performance that was part of the basis for your acceptance. A final transcript of your grades must be forwarded to this office as soon as your school year ends.

You will be receiving additional information concerning summer programs, combined-degree programs, and other topics of interest as the year progresses. I and others at the medical school will try to keep you well informed of all important or interesting topics.

On behalf of the students, faculty, and administration at Tulane, I bid you a most enthusiastic welcome. If I can be of service to you in any way, please feel free to call upon me.

Sincerely yours,

# The Oath of Hippocrates

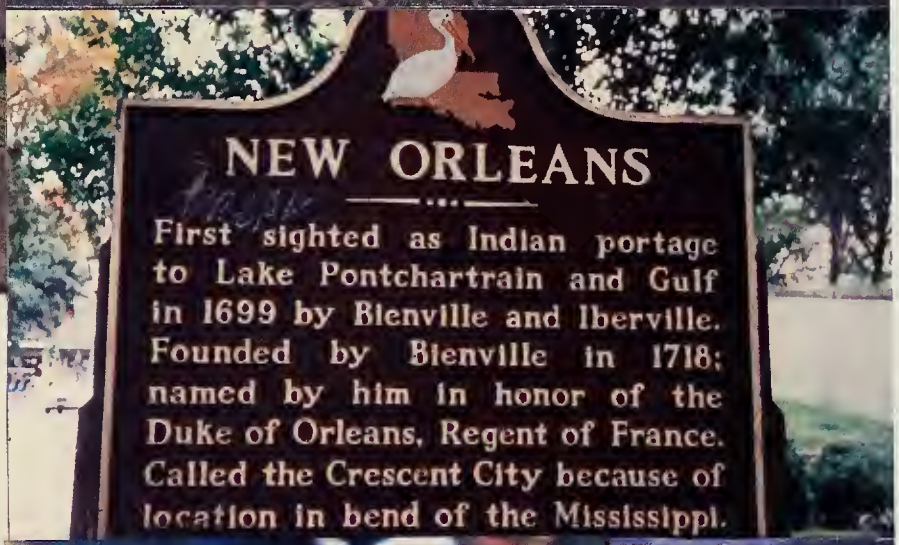
I swear by Apollo, the physician, the Aesculapius, and Health and All-Heal, and by God and by whatever I hold most sacred, that according to my ability and judgement, I will keep this Oath and this stipulation - I will look upon those who shall have taught me this Art even as one of my parents. I will share my substance with them, and I will supply the necessities if they be in need.

I will regard their offspring in the same footing as my own brethren, and I will teach this art, if they shall with to learn it, without fee or covenant.

I will impart a knowledge of the Art by precept, by lecture, and by every mode of teaching not only to my own children but to the children of those who have taught me, and to disciples bound by covenant and oath, according to the Law of Medicine, but to none other. The regimen I adopt shall be for the benefit of my patients according to my ability and judgment and I will abstain from whatever is deleterious and mischevious.

I will seek to inform my patients fully about their illness and prognosis, and will always remember that the final decision regarding their own life rests with the patient. I will regard my patients always as fellow human beings and will do everything possible to perseve their dignity. With purity and with holiness I will my life and practice my Art. Whatsoever things I see or hear concerning the life of men in my attendace, on the sick or even apart therefrom, which ought not to be noised abroad, I will keep silence thereon, counting such things to be sacred secrets.

While I continue to keep this Oath unviolated, may it be granted to me to enjoy life and the practice of the Art, respected by all men, in all times. But should I trepass and violate this Oath, may the reverse be my lot.



NEW ORLEANS
First sighted as Indian portage to Lake Pontchartrain and Gulf in 1699 by Bienville and Iberville. Founded by Bienville in 1718; named by him in honor of the Duke of Orleans, Regent of France. Called the Crescent City because of location in bend of the Mississippi.

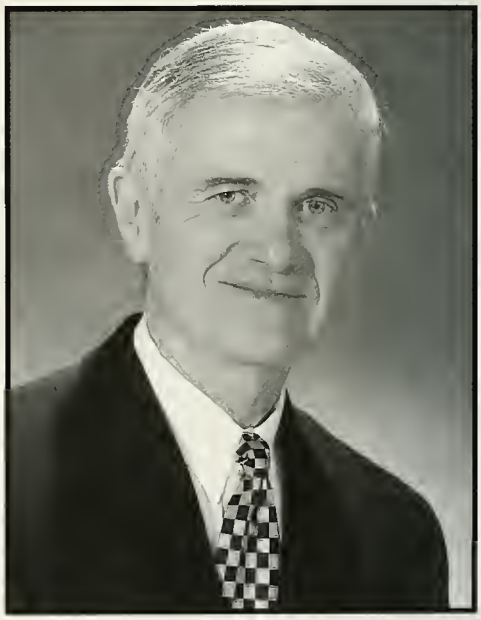
**Dr. Cathy Lazarus**

Dr. Lazarus is Professor of Clinical Medicine, Assistant Dean for Graduate Medical Education, and Director of the Foundations in Medicine Program at Tulane University School of Medicine. She is married to another Tulane faculty member, Dr. Eric Simon (Department of Medicine) and together they have 2 teenaged children.

Dr. Lazarus received her undergraduate degree from the University of Michigan in Ann Arbor. She attended medical school and completed her internal medicine residency at Washington University in St. Louis, MO. Prior to joining the Tulane faculty in 1994, she was the Assistant Dean for Student Affairs and Director of the Student and Employee Health Service at Washington University. Since coming to Tulane, Dr. Lazarus has worked extensively in the areas of medical student and resident education and student professional development. She is well known to first-year students through the Foundations in Medicine course, and enjoys teaching them again as third and fourth-year students on the internal medicine rotation.

Through the efforts of many students and faculty, she has helped to create the Values in Medicine Program, for which Tulane has garnered a national reputation for leadership in the promotion of humanism, professionalism and reflection for students.

Dr. Lazarus is the proud and grateful recipient of numerous awards for teaching including OWL club awards for Outstanding Attending in Medicine, the Clifford M. Newman Award for Student Advocacy, the Humanism in Medicine faculty award, and the Chancellor's Teaching Scholar award. Dr. Lazarus considers it an immense privilege to serve as a Class of 2003 sponsor, and believes she has the greatest job in the world at the greatest medical school. She thanks all of the students for teaching her something new every day.



**Dr. Paul Rodenhauser**

Dr. Rodenhauser is currently the Assistant Dean for Academic Counseling Service and the Director of Medical Student Education in Psychiatry here at the Tulane University School of Medicine. He received his undergraduate education at Gettysburg College in Gettysburg, Pennsylvania, went to medical school at Jefferson Medical College in Philadelphia, and completed his residency training at the Sheppard & Enoch Pratt Hospital in Towson, Maryland.

Serving as chief resident there inspired his interest in education and administration, and since joining the Tulane faculty in 1991, Dr. Rodenhauser's enthusiasm has been has been honored with numerous awards, including many Owl Club Outstanding Teaching Awards and the Gloria P. Walsh Award for Teaching Excellence. He was the first ever recipient of the W. Clifford Newman Award for student advocacy (which he had the distinction of receiving twice), Tulane's AOA Medical Education Contribution Award, and the Tulane School of Medicine Chancellor's Teaching Scholar Award.

From helping us physically into our coats at our White Coat Ceremony to helping us understand and fill our role of physicians in those white coats, Dr. Rodenhauser has been at every step of our journey. Although we are saddened by his retirement this year, we are truly blessed to have had the opportunity to work with and learn from the best! We want to thank him for always being there to support and encourage us and we wish the best in your retirement!!

Great: I bought an otoscope and the complete sphygmomanometer set (pediatric cuff included). Now I can check my family members' blood pressure. Too bad that's the only use these expensive tools will be only use since the HOSPITALS ALREADY HAVE THESE TOOLS AT THE PATIENTS' BEDSIDE. Thank you. Mr. Welch Allyn sales rep.

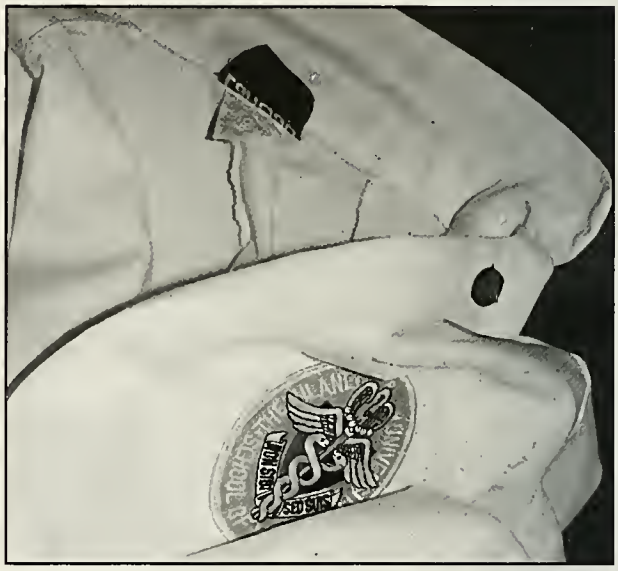
# The White Coat: 4th Year

## Cha-cha-cha-changes

Is it no longer part of the uniform; a hawaiian shirt with your scope will suffice unless. . .

. . . . you are "dressing to impress" the underclassmen?



Does it have a terminal case of ring-around-the-collar ?

Is it deep within the closet, never again to see the light of day, still with a full compliment of MRSA and VRE?

Do you even know where your coat is, or what it's been up to?

# You Know You're At Home In New Orleans When...

1. You no longer worry about being below sea level.
2. You can not only say Tchoupitoulas, but you can say it without laughing.
3. You consider reinforcing the attic floor so you can store more beads up there.
4. You begin to think that purple, green, and gold look good together.
5. You think of streetcars and ferries as transportation, not entertainment.
6. You know who won the most recent Tulane-LSU game.
7. You go to Pat O'Brien's and don't order a hurricane.
8. You know exactly what you are going to eat on Monday and every Monday after that.
9. You are no longer shocked when someone advises you to "suck the heads and eat the tails."
10. You don't think twice about being called baby or honey by perfect strangers.
11. You're not afraid when someone wants to "axe" you.
12. You are no longer alarmed to find baby dolls in your cake.
13. You learn to swallow the baby dolls without letting anyone know.
14. You consider it an honor, on certain occasions, to have cabbages or coconuts thrown at you.
15. You always look both ways before going through a green light.
16. You "make groceries", not buy them.
17. You don't think twice about walking outside with a beer in your hand.
18. You cannot remember the last time you heard the words "last call".
19. You think a ten foot ceiling is rather low.
20. You drink Dixie instead of singing it.
21. You can navigate without ever making a left turn.
22. You no longer giggle at the idea of a grown man being named "Dutch" or "Moon", or "Bubba".
23. You no longer expect the long hot summer to be only three months long, or four months, or five months, or six.
24. You get on a bus marked "Cemeteries" without a second thought.
25. You have discovered that those four-inch-long cockroaches can fly, but have decided to retain your sanity anyway.
26. You've finally mastered the art of hitting a cockroach with a shoe just hard enough to kill the cockroach but not to ruin your carpet.
27. You do not think about spinach when you see the word "Popeye's".
28. You have considered the free wedding at the Chicken Box for purchasing 1,000 pieces of fried chicken.
29. Your favorite football team wins four games in one year and you are exhilarated by the great season.
30. You pronounce Milan with the accent on the first syllable.
31. You know the coffee is going to have chicory in it, but you order it anyway.
32. You stop referring to places in relation to compass points and start referring to them in relation to water.
33. You think "lagniappe" is the prettiest word in any language.
34. You know that living anywhere else in the world would be very sad.

### *Stacey Richman*

Dear Stacey Lauren,
This day you will recite the Hippocratic Oath, and become the first Physician in our family.
At your "White Coat" ceremony, four years ago, you and your fellow classmates were asked to coin a word about your future aspirations, and what a Medical Degree would mean to each one of you in the future.
You walked up to the podium, and without a doubt in your mind, you poignantly said the following two words: "dedication" and "devotion". Since that day, you have demonstrated in your studies and with your patients exactly that.
You have demonstrated an incredible sense of what is right and what is not. Your conduct as a medical student, the respect you definitely deserve from both your patients and your professional staff, show all the evidence of how important these simple, yet meaningful words emanating so easily from your lips to you now and then.

### *Stacey Richman*

We, your parents, are certain that the "coinage" of those two words will follow you the rest of your personal and professional life.
Your future patients will receive the quality of care they deserve, simply because, everyone you have ever helped to treat, you have regarded as "people", and not just as "patients". This is a very rare gift, indeed.

### *Stacey Richman*

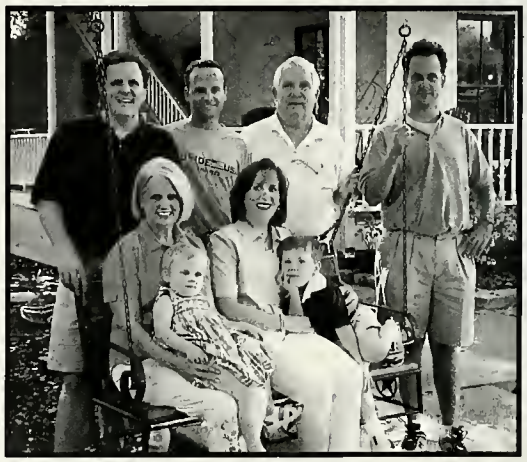
**Those two prophetic words, uttered by you four years ago, "devotion" and "dedication" you have demonstrated repeatedly.**
**We are thankful to have a daughter as wonderful, intelligent, feeling, and accomplished, as you, are.**
**We are certain that now, and in the future, you will forever add to that pride and joy.**
**We rejoice with you today, our emotions will be evident as you recite that ancient oath, so meaningful, so hard worked for, and so deserved.**
**We are positive that you will forever add to that pride and joy!**

**With Everlasting Love,**
**Mom & Dad**

### *Brannon Raney*

Brannon:
You did it! We are so proud of you and admire your tenacity. We wish you the best in the field of medicine that you choose and know that there will be some grateful folks out there who call you doc!

Mom, Dad, Daniel, Amy, Steve, Carson & Alexander



*Brigitte Rolfe*

**Congratulations! We're very proud of you and your accomplishments. You've exceeded our expectations and aspirations. You're a beautiful, intelligent woman remarkable in character and qualities, inspiring in thoughts and ideas with a loving and genuine heart. Imagine, life without that backpack! "Brava Bella...Ti Vogliamo Bene."**
**Mama and Papa**

*Amir Shirmohammad*

***We are truly grateful to have you in our lives because you are such a kind, caring, wonderful, and intelligent person.***

## We Innovate Healthcare

# *From Research to Real Life.*

*We all dream of doing big things. Solving important problems. Making a difference. Improving lives. Transforming these dreams into reality requires ambition, creativity, and a company like ours to help put all the elements together.*

Roche is a leader in preventing, diagnosing and treating disease, enhancing the quality of life for everyone. We invest almost $2 billion a year in innovative research, and our capabilities combine traditional biomedical science with the latest advances in biotechnology, genetics and genomics. Our investment in research has led to the recent introductions of important new medicines for obesity and flu. And our current pipeline includes advances for treating cancer, osteoporosis and hepatitis C.

Few companies possess the global strength in both diagnostics and therapeutics that Roche enjoys. By forging closer links between diagnosis and treatment, we're leading the way to a new dimension in healthcare – individualized medicine. This approach identifies the best treatment for a specific individual.

And since we understand that every individual is unique, we strive to ensure a diverse environment. Roche encourages creativity and embraces differences in talent, education, workstyle, lifestyle and culture.

Obesity, transplant medicine, diabetes, breast cancer, hepatitis, influenza and HIV – just some of the real life issues Roche is focusing on. And providing solutions for.

Visit our global website at www.roche.com or our U.S. website at www.rocheusa.com.
